About Me:

Vocational high school graduate with a specialization in Software Engineering, skilled in database analysis and management. Proficient in organizing, analyzing, and maintaining data systems to optimize efficiency and accuracy. Highly motivated to build hands-on experience in a professional setting and excited to contribute to Your company with my technical skills and a strong commitment to continuous learning.

Work Experience:

IT Support
PT. ADVICS MANUFACTURING INDONESIA
July 2024 - October 2024

- Analyzed database and server requirements for new systems, assessing capacity needs and recommending infrastructure improvements to support system scalability and reliability.
- Performed regular maintenance on IT hardware to ensure optimal functionality, addressing issues with computers, servers, printers, and other peripherals.
- Provided technical support for the scanner project related to Kanban, ensuring seamless operation and troubleshooting issues to maintain efficient workflow.
- Documented and tracked IT assets across the company, maintaining an up-to-date inventory to support asset management and resource planning.

Certificate:

- Participation in Export Competition – FedEx, 2023
Awarded a certificate for active participation in an export competition organized by FedEx, gaining valuable insights into international trade processes and logistics.
- Internship Certificate – PT. ADVICS MANUFACTURING INDONESIA, 2024
Completed a professional internship with hands-on experience in IT support. Gained practical skills in maintaining IT Hardware, documentation and tracked IT Asset and contributed to project for kanban scanner.
